

# Anmol

## Branch, Flower & Fruit Enhancer

### THE MOST EFFICIENT FOR Branch, Flower & Fruit Enhancer

Seerin Anmol is a Biostimulant. It contains ingredients that alter the growth and development of the plant. These growth promoters include Cytokinin, Xanthophyll, and other growth hormones. Plant roots and shoots produce more cells when these growth hormones are present. Axillary bud growth, apical dominance, and leaf senescence are also affected. It is advised to use during fruit and vegetable growth to increase yield. It also helps to improve flower, fruit, and branch formation to loosen and elongate clusters. It will increase fruit size and stimulate sprouting of lateral and sub-lateral branches, resulting in higher yield.

#### CONTENT:

Total Cytokinin	15.0%
Total Xanthophyll	0.5%
Total Plant Extract	15%
Total Chlorophyll	0.85%
Total Amino Acid	50ppm
Total B1, B2, B6	20 ppm

**BENEFIT:** Completely water-soluble and Suitable for fertigation, Foliar application, and a moderately low pH and salt index. Suitable for fertigation and foliar application.

**DOSE:** For foliar spray 80 ml in 200 Liter water along with 250gm Akshat Combi-2.

**SPECIALITY:** High field efficacy. Boost in EC. Seerin- Anmol is compatible with most water-soluble fertilizers. Safe and Easy to Use.

**CROPS:** All Vegetable Crops, fruits, field crops, and Nursery Plants.
