

Micropower -L

Root Enhancer

THE MOST EFFICIENT FOR Root Enhancer

Micropower-L is a bio-organic nutritional product achieving higher yields and supporting over plants and development. In addition to improving the color, luster, and taste of fruits and vegetables, amino fine also enhances nutritional uptake and utilization. Aminofine has also been proven to be an excellent anti-adversity agent against environmental factors.

BENEFIT:

- Increases fruit size and weight
- Non-toxic and safe for the environment and cattle
- Improves crops quality and builds resistance to diseases and bacilli.
- Speed up cell elongation and cell division and ultimately increase yields.
- Enhances protein synthesis and microflora.

Direction of USE

5 to 10 ml in 15 Ltr. of Water

CROPS: All Vegetable Crops, fruits, field crops, and Nursery Plants.
