

**Mg Nitrate**  
Fruit Harvest

**THE MOST EFFICIENT FOR Fruit Harvest**

Seerin<sup>NITRA</sup>-Magnesium Nitrate is an effective fertilizer for application through drip irrigation systems in field soil. Magnesium nitrate can be used in acidic soil for better results. Help in crop development through foliar spray and fertigation. Benefits of nutrient-poor (N & Mg) crops. It is a characteristic pH controller for improving the condition of acidic soils by fertilization because of the acidic pH. Solubility (g/l) at 25 °C is 720.

Seerin-Magnesium Nitrate can be used for drip irrigation, foliar spraying, or as a material for water-soluble NPK.

**CONTENT:**

|                           |        |
|---------------------------|--------|
| Total available Nitrogen  | 48%    |
| Total available Magnesium | 10.5%  |
| Total moisture% maximum   | 1.5%   |
| Chloride                  | <0.02% |
| EC (mS/cm)                | 7.54   |
| pH                        | 6.1    |

**BENEFIT:** Completely water-soluble and Suitable for fertigation, Foliar application, and a moderately low pH and salt index. Suitable for fertigation and foliar application. Crops with a higher requirement for magnesium are recommended to use Magnesium Nitrate.

**DOSE:** For drip 3 Kg per Acre at harvesting stage regularly.

**SPECIALITY:** High field efficacy. Boost in EC. Seerin- Magnesium Nitrate is compatible with most water-soluble fertilizers. Safe and Easy to Use. Low chloride and insoluble matter content.

**CROPS:** All Vegetable Crops, fruits, field crops, and Nursery Plants.
