

Ammonium Sulphate

Fruit Harvest

THE MOST EFFICIENT FOR Fruit Harvest

Seerin-^{SULPHA} Ammonium Sulphate is a CAPROLACTUM grade. It increases drought tolerance by enhancing root development. Helping to maintain a dark green color by promoting chlorophyll production, promoting nodule formation on legumes. Aiding in the conversion of nitrates into proteins. Stimulating seed production and early maturity. Assisting in the breakdown of the organic and improving soil structure and water infiltration.

CONTENT:

Total available Nitrogen	20.5%
Total available Sulfur	23%
Total moisture% maximum	1%
Free acidity as (sulfuric acid)	0.025%
EC (mS/cm)	12.37
pH	6.7

BENEFIT: Increasing drought tolerance through enhancing root development. Help in maintaining a dark green color promoting chlorophyll production. Promoting nodule formation in legumes. Aiding in the conversion of nitrates into proteins. Stimulating seed production and early maturity. Being an integral part of certain amino acids. Assisting in the breakdown of organic matter. Improvising soil structure and increasing water infiltration.

DOSE: For drip 5 Kg per Acre at harvesting stage regularly & for foliar spray 1 Kg in 200 Liter water along with 250gm Akshat Combi-2.

SPECIALITY: High field efficacy. Boost in EC. Seerin- Ammonium Sulfate is compatible with most water-soluble fertilizers. Safe and Easy to Use. Low chloride and insoluble matter content.

CROPS: All Vegetable Crops, fruits, field crops, and Nursery Plants.

Advisory: Consult our agronomist or company representative for further information. Doses are recommended on a production basis.
