Ammonium Polyphosphate Technology™

**THE MOST EFFICIENT FOR
Longer-Term Availability**

Among the nitrogen and phosphorus nutrient categories, Seerin Ammonium Polyphosphate ^{PHOSPHA} (14:65:00) is the only & best grade available. In plants, phosphorus is available in the form of orthophosphate chains, while nitrogen is available as ammonia. Due to the chain effect, Phosphorus gradually gets to the plants with a better result-oriented action. It induces early flowering and early fruiting stages in plants. Plants benefit from it as it strengthens the stem, making it essential for a later harvest. The dosage of ammonium polyphosphate fertilizer was drastically reduced. It is used about 50-60% less than other phosphate fertilizers. Lower dose with higher efficiency.

CONTENT:

Total available Nitrogen	14%
Total available Phosphorus	65%
Total moisture% maximum	0.5%
Solubility	170 g/ml
Nutrient availability	up to 80%
pH	Neutral

BENEFIT: Completely water-soluble and minimal fixation in soil, provides phosphorus for a longer duration. Foliar application, and a neutral pH and salt index. Suitable for fertigation and foliar application.

DOSE: For drip 2-3 Kg per Acre at regular intervals through the crop duration & for foliar spray 1 Kg in 200 Liter water along with 250gm Akshat Combi-2.

SPECIALITY: High field efficacy. Boost in EC. Seerin- 14:65:00 is compatible with most water-soluble fertilizers. Safe and Easy to Use. Low chloride and insoluble matter content.

CROPS: All Vegetable Crops, fruits, field crops, and Nursery Plants.

Advisory: Consult our agronomist or company representative for further information. Doses are recommended on a production basis.
