**THE MOST EFFICIENT FOR
Quality Development**

Seerin ^{SULPHA} Polysulphate (KMS) is a fully water-soluble fertilizer, a highly efficient source of Potassium, Magnesium, and Sulphate for plants. As a nitrogen-free fertilizer, Seerin Polysulphate is used to increase fruit growth and promote root growth. Polysulphate maintains the chlorophyll contained in the cells. It increases the photosynthesis activity of the plants, plants resulting in higher yield, Improves drought tolerance, Increases stalks with long-branched roots, Helps in reducing premature fruit drop, Low-cost potassium source. It can be added to the surface or blended into the soil. It's also provided by drip fertigation.

CONTENT:

Total available Potassium	22%
Total available Magnesium	18%
Total available Sulfur	20%
Solubility g/L at 25C	220
EC (mS/cm)	15.7
pH	6.2

BENEFIT: Completely water-soluble and Suitable for fertigation, Foliar application, and a moderately low pH and salt index. Suitable for fertigation and foliar application.

DOSE: For drip 3 Kg per Acre at harvesting stage regularly along with Seerin 17:09:29 6 kg per acre. For foliar spray 1 kg in 200 Liter water along with 250gm Akshat Combi-2.

SPECIALITY: High field efficacy. Boost in EC. Seerin- 22:18:20 Polysulphate is compatible with most water-soluble fertilizers. Safe and Easy to Use. Low chloride and insoluble matter content.

CROPS: All Vegetable Crops, fruits, field crops, and Nursery Plants.

Advisory: Consult our agronomist or company representative for further information. Doses are recommended on a production basis.
