

# High Zinc

## Fruit Harvest

### THE MOST EFFICIENT FOR Fruit Harvest

Akshat High Zink is a multi-micronutrient fertilizer. High Zink is a mixture of micronutrient elements containing iron, manganese, copper, and boron. It improves soil fertility and crop production. Mo, Zinc (Zn) is a micronutrient critical for proper growth and development in plants. Although we do not fully understand zinc's specific role, zinc is certainly involved in the synthesis of chlorophyll, protein, and various enzymes involved in metabolic reactions for proper growth.

**CONTENT:**

|                    |      |
|--------------------|------|
| Total available Zn | 6%   |
| Total available Fe | 4%   |
| Total available Mn | 3%   |
| Total available Cu | 0.8% |
| Total available B  | 1.2% |
| Total available Mo | 0.1% |

**BENEFIT:** Completely water-soluble and Suitable for fertigation, Foliar application, and a moderately low pH and salt index. Suitable for fertigation and foliar application.

**DOSE:** For drip 10 Kg per Acre at the time of soil preparation

**SPECIALITY:** High field efficacy. Boost in EC. Seerin- High Zinc is compatible with most water-soluble fertilizers. Safe and Easy to Use.

**CROPS:** All Vegetable Crops, fruits, field crops, and Nursery Plants.
