

**Zn EDTA 12%**  
Fruit Harvest / Catalyzer

**THE MOST EFFICIENT FOR  
Fruit Harvest / Catalyzer**

Akshat Zn EDTA is a microelement product used for growing vegetables, citrus, fruits, trees, ornamentals, cut flowers, hydroponics, legumes, vineyards, and tropical crops. In order to get a good distribution within the plant, it is recommended that the product be applied during the development of the plant.

**DOSE & RECOMMENDATIONS:**

Deficiency	Soil Application	Foliar Application
Low deficiency	1-2 Kg / ha	100-150 g/100ltr
Medium deficiency	2-4 Kg / ha	150-200 g/100ltr
Strong deficiency	3-6 Kg / ha	250-400 g/100ltr

\*Total per cycle. It should be applied to fractions.

\*\* Minimum use of water of 600 ltr./ha in vegetables, 800-1.500ltr./in fruit trees. As a guideline, these doses can be modified by the consumer according to the growth of the crop. Contact our local agronomist for more information.

**BENEFIT:** Completely water-soluble and Suitable for fertigation, Foliar application, and a moderately low pH and salt index. Suitable for fertigation and foliar application.

**ROLE OF 'Zn' EDTA IN PLANTS:** Zinc plays an essential role in the biosynthesis of protein in plants by activating enzymes. It helps plants withstand cold temperatures by forming chlorophyll and converting starches to sugar. Also, it is essential for the formation of auxins, which are responsible for stem elongation and growth regulation.

**SPECIALITY:** High field efficacy. Boost in EC. Seerin- Zn EDTA is compatible with most water-soluble fertilizers. Safe and Easy to Use.

**CROPS:** All Vegetable Crops, fruits, field crops, and Nursery Plants.
