

**Copper EDTA 12%**  
**Crop Harvest**

**THE MOST EFFICIENT FOR Crop Harvest**

AKSHAT Copper-EDTA is a microelement product for use on - Vegetables, citrus, Fruits, Trees, Ornamentals, cut flowers, hydroponic, cereals, legumes, vineyards, tropical crops, etc. It is recommended that the product be used during the development of the plant to ensure a good distribution within it.

**DOSE & RECOMMENDATIONS:**

Deficiency	Soil Application	Foliar Application
Low deficiency	1-2 Kg / ha	100-150 g/100ltr
Medium deficiency	2-4 Kg / ha	150-200 g/100ltr
Strong deficiency	3-6 Kg / ha	250-400 g/100ltr

\*Total per cycle. It should be applied to fractions.

\*\* Minimum use of water of 600 ltr./ha in vegetables, 800-1.500ltr./in fruit trees. As a guideline, these doses can be modified by the consumer according to the growth of the crop. Contact our local agronomist for more information.

**BENEFIT:** Completely water-soluble and Suitable for fertigation, Foliar application, and a moderately low pH and salt index. Suitable for fertigation and foliar application.

**ROLE OF 'Cu' EDTA IN PLANTS:** Copper is an effective source for hydroponics, fertigation, and foliar fertilization. In the mechanism of respiration, copper EDTA is used by plants as a catalyst. Copper EDTA plays an essential role in several enzyme systems & in carbohydrate & protein metabolism.

**SPECIALITY:** High field efficacy. Boost in EC. Seerin-Cu EDTA is compatible with most water-soluble fertilizers. Safe and Easy to Use.

**CROPS:** All Vegetable Crops, fruits, field crops, and Nursery Plants.
