

Calcium EDTA 6%
Crop Harvest

THE MOST EFFICIENT FOR Crop Harvest

Akshat Calcium-EDTA is a microelement product suitable for use with vegetables, citrus, fruits, trees, ornamentals, hydroponics, cereals, legumes, vines, tropical crops, etc. Application of the product during plant development is recommended to ensure a good distribution within the plant.

DOSE & RECOMMENDATIONS:

Deficiency	Soil Application	Foliar Application
Low deficiency	1-2 Kg / ha	100-150 g/100ltr
Medium deficiency	2-4 Kg / ha	150-200 g/100ltr
Strong deficiency	3-6 Kg / ha	250-400 g/100ltr

*Total per cycle. It should be applied to fractions.

** Minimum use of water of 600 ltr./ha in vegetables, 800-1.500ltr./in fruit trees. As a guideline, these doses can be modified by the consumer according to the growth of the crop. Contact our local agronomist for more information.

BENEFIT: Completely water-soluble and Suitable for fertigation, Foliar application, and a moderately low pH and salt index. Suitable for fertigation and foliar application.

ROLE OF 'Ca' EDTA IN PLANTS: Initially, calcium deficiency symptoms appear as localized tissue necrosis leading to stunted growth, necrotic margins on young leaves, and eventually death of terminal buds and roots. It is required for continuous cell division & formation.

SPECIALITY: High field efficacy. Boost in EC. Seerin- Ca EDTA is compatible with most water-soluble fertilizers. Safe and Easy to Use.

CROPS: All Vegetable Crops, fruits, field crops, and Nursery Plants.
