

# Boron 20%

## Fruit Harvest

### THE MOST EFFICIENT FOR Fruit Harvest

AK-BORE is an ideal boron fertilizer to correct boron deficiency in soil & crops. It increases profit by maximizing yield. It contains water-soluble Boron at a minimum of 20%. Boron (B) has a significant effect on pollen germination & pollen tube growth. The viability of pollen grains also decreases when B is deficient.

#### DOSE & RECOMMENDATIONS:

Deficiency	Soil Application	Foliar Application
Low deficiency	1-2 Kg / ha	100-150 g/100ltr
Medium deficiency	2-4 Kg / ha	150-200 g/100ltr
Strong deficiency	3-6 Kg / ha	250-400 g/100ltr

\*Total per cycle. It should be applied to fractions.

\*\* Minimum use of water of 600 ltr./ha in vegetables, 800-1.500ltr./in fruit trees. As a guideline, these doses can be modified by the consumer according to the growth of the crop. Contact our local agronomist for more information.

**BENEFIT:** Completely water-soluble and Suitable for fertigation, Foliar application, and a moderately low pH and salt index. Suitable for fertigation and foliar application.

**ROLE OF 'B' EDTA IN PLANTS:** Boron's principal function is related to cell wall strength & development, cell division, fruit & seed development, sugar translocation & hormone synthesis. The Boron requirement at flowering & seed set may be higher than that needed for vegetative growth.

**SPECIALITY:** High field efficacy. Boost in EC. Seerin- Boron is compatible with most water-soluble fertilizers. Safe and Easy to Use.

**CROPS:** All Vegetable Crops, fruits, field crops, and Nursery Plants.
