

Myco-Ly
Nutrient Absorption

THE MOST EFFICIENT FOR Nutrient Absorption

Akshat Myco-Ly is a mycorrhiza. Akshat MRH-GR Specially designed for Vegetables & Paddy. It is helpful for solubilizing fix phosphate in the soil. What do mycorrhizae do? Mycorrhizae permit the plant to obtain additional moisture and nutrients. It is vitally important in the uptake of phosphorus, one of the major nutrients required by plants.

BENEFIT: Some of the benefits are as follows:

- Boost natural defenses against diseases.
- Increase flowering, pollination, and fruit set.
- Activate anti-stress genes.
- Improve the quantity and quality of vegetables and paddy.
- Reduce stress symptoms.

ROLE OF 'Mycorrhiza' IN PLANTS: A mycorrhiza is a symbiotic association between a green plant and a fungus. The plant makes organic molecules such as sugars by photosynthesis and supplies them to the fungus, and the fungus supplies to the plant water and mineral nutrients, such as phosphorus, taken from the soil.

DOSE: For Soil App. 1 Kg per Acre with a 6 lac count is our strength.

SPECIALITY: High field efficacy. Boost in EC. Seerin- Mycorrhiza is compatible with most water-soluble fertilizers. Safe and Easy to Use. Low chloride and insoluble matter content.

CROPS: All Vegetable Crops, fruits, field crops, and Nursery Plants.
