

Seerin-Urja Soil Application (Basal)

SECONDARY FERTILIZER

THE MOST EFFICIENT FOR Soil Application (Basal)

Seerin^{SULPHA} Urja is a water-soluble fertilizer consisting of elements that play a significant role in Plant Metabolism. Calcium, Magnesium, Sulphur, and Silicon are the elements in the Seerin-Urja. Calcium deficiency symptoms appear as localized tissue necrosis leading to stunted growth, necrotic margins on young leaves. The lack of sulphur results in growth and color changes. Plant requirements for sulphur are equal to those for phosphorus, although sulphur is not considered one of the primary plant nutrients.

CONTENT:

Total available Ca	07%
Total available Magnesium	09%
Total available Sulfur	12%
Total available Silicon	29%
EC (mS/cm)	15.7
pH	6.2

BENEFIT: Completely water-soluble and Suitable for fertigation, Foliar application, and a moderately low pH and salt index. Suitable for fertigation and foliar application.

DOSE: For drip 100-200 Kg per Acre at the time of soil preparation
SPECIALITY: High field efficacy. Boost in EC. Seerin-Urja is compatible with most water-soluble fertilizers. Safe and Easy to Use. Low chloride and insoluble matter content.

CROPS: All Vegetable Crops, fruits, field crops, and Nursery Plants.
